## 3M™ Night Vision Sun Control Films

- Ensure clear views, day and night
- Low interior and exterior reflectivity to ensure privacy at night
- Reduce heating and cooling costs
- Significant reductions of glare

# 3M™ Night Vision Sun Control Films NV 15, NV 25, NV 35

## The 3M Night Vision Series

3M Night Vision Window Film offers protection from the sun's damaging UV rays and controls heat and glare, while inviting warm, natural light into the room and increasing comfort. Depending on the film type, up to 79% of the sun's heat is rejected. By significantly reducing glare, our films help employees do their work without the added eyestrain from excessive light. And, unlike most other sun control films, 3M Night Vision Window Film has a low interior reflectivity that leaves your view clearer than ever, especially at night. Higher external reflectance provides privacy against prying eyes looking in (light condition dependent).

## Your benefits at a glance

- Enjoy clear views day and night
- Enjoy maximum privacy at night
- Protect skin and furnishings from damaging UV rays
- Reduce heat and glare
- Preserve a room's warmth and natural beauty
- Avoid heavy window coverings

## Easy Application by 3M partners

3M Window Films are very easy to install using a water and soap solution. Full adhesion is reached after approximately 20 days at 18 °C (in dry conditions).

## Easy Cleaning

3M Window Films may be cleaned 30 days after installation using only ordinary window cleaning agents and avoiding the use of abrasive particles. Do not use rough sponges, cloths or brushes. Synthetic sponges, soft wipes or rubber squeegee cleaners are recommended.
